About Cache Digitech

Who We Are

Innovate. Secure. Scale. With Trust.
Cache Digitech Pvt. Ltd. is not just a technology company — it's a story of courage, conviction, and compassion.
Founded by Prarthana Gupta , a visionary entrepreneur who turned a modest beginning into a movement, Cache has grown into one of India's most trusted System Integration and IT Infrastructure organizations — serving leading enterprises across Telecom, BFSI, Manufacturing, Consulting, and Government sectors.

For over three decades , we've been the unseen force behind our customers' success — consulting, designing, building, and operating mission-critical IT systems with precision and care. Our 24×7 Global NOC & SOC ensure that our clients sleep peacefully while we keep their technology alive, secure, and performing at its best.

But beyond technology, Cache is a belief — that trust is earned, not claimed . We are a women-led organization that thrives on diversity, inclusion, and sustainability — where every decision is guided by empathy and purpose, not just profit.

Our teams work hand-in-hand with global OEMs and partners to create solutions that are future-ready, secure, and built to last. We take pride in going beyond contracts, in solving problems first, and in standing by our customers through every challenge.

Because at Cache, we don't just build technology — we give life to it.

We don't just deliver projects — we deliver peace of mind.

And as we move toward our Vision 2030 , we are writing our story — brick by brick — to become one of the best organizations for our customers, OEMs, partners, and employees, setting benchmarks in excellence, inclusion, and sustainability.

About Cache Digitech
Cache Digitech is a global system integrator that partners with leaders in
business and society to tackle their most important challenges and capture their
greatest opportunities.

About Cache
Since its founding in 1991, Cache has been a pioneer in business strategy.
Today, we work closely with clients to empower their organizations to grow,
build sustainable competitive advantage, and drive positive societal impact.

Founded By
Prarthana Gupta

Consulting & Auditing
Enterprise Compliance and Audit Excellence

Overview
At Cache Digitech, we enable organizations to establish a foundation of integrity, transparency, and accountability through advanced compliance and audit solutions. Our integrated frameworks leverage automation, analytics, and AI to ensure regulatory alignment, operational resilience, and sustained stakeholder trust.
Our Capabilities

Comprehensive Compliance & Audit Capabilities

Regulatory Compliance Management
We streamline the management of complex regulatory landscapes by embedding automation into compliance mapping, control validation, and reporting. Our compliance frameworks align with leading global standards including ISO 27001, SOC 2, and GDPR, ensuring security, privacy, and governance across all data and integration environments. For regulated industries, we design solutions that support compliance with PCI-DSS, HIPAA, and RBI guidelines, enabling our clients to meet their specific regulatory obligations with confidence.

Intelligent Audit Automation
Cache Digitech transforms traditional audits into continuous, data-driven oversight processes. Through AI-enabled monitoring and automated evidence collection, our systems deliver real-time visibility into compliance health, enabling early identification of control deficiencies and accelerating remediation.

Enterprise Risk and Control Assessment
We employ advanced analytics to identify, evaluate, and prioritize enterprise risks across business functions, third parties, and IT ecosystems. Our risk scoring methodologies provide actionable intelligence, empowering leadership to make proactive, informed, and compliant decisions.

Policy and Document Governance
Our governance solutions centralize policy creation, approval workflows, and version control. Automated audit trails and access management ensure accountability, transparency, and traceability across all compliance documentation.

Third-Party and Vendor Compliance
Through unified dashboards and real-time tracking, we help organizations continuously evaluate third-party compliance performance, certification status, and contractual obligations — reinforcing the integrity of your extended value chain.
Strategic Excellence

Our Strategic Approach

Automation-Centric Frameworks
Minimize manual effort through intelligent workflows, AI-driven control validation, and predictive analytics.

Comprehensive Visibility
Real-time dashboards, compliance heatmaps, and audit trails enhance oversight and accountability.

Seamless Integration
Interoperability with enterprise platforms such as GRC, ERP, CRM, and major cloud ecosystems.

Security and Governance by Design
Embedded data protection, access control, and compliance with international privacy regulations ensure end-to-end assurance.
Industry Expertise

Industry Coverage
Our compliance and audit solutions are tailored to the specific regulatory and operational needs of multiple industries:

Banking & Financial Services (BFSI)
RBI, ISO, and SOC 2 compliance automation and control testing.

Healthcare
HIPAA-aligned frameworks for data governance and patient information security.

Telecommunications
SLA adherence, regulatory reporting, and continuous network compliance monitoring.

Manufacturing & Industrial
ESG compliance tracking, process control audits, and safety governance.

Retail & E-commerce
Data privacy compliance, customer data protection, and transaction integrity assurance.
Competitive Edge

Turning Compliance into Competitive Advantage
At Cache Digitech, we redefine compliance as a catalyst for operational excellence and organizational trust. By integrating AI, automation, and advanced analytics, we help enterprises evolve from reactive compliance management to proactive governance and strategic foresight.

AI-Driven Intelligence
Leveraging artificial intelligence and automation to transform compliance from burden to strategic advantage.

Advanced Analytics
Data-driven insights that enable proactive risk management and strategic decision-making.
Compliance is no longer a burden — it's a differentiator that drives sustainable growth.

Growth is Guaranteed
That's Cache's Promise

Product & Services

Data Analytics & AI
Data & AI Solutions

Harnessing Data and AI

for Strategic Business Growth

At Cache Digitech, we believe that data and artificial intelligence are the cornerstones of modern business transformation. We empower organizations to evolve into intelligent, insight-driven enterprises — where every decision is informed by analytics and every process is optimized through AI.

Our Mission

Transform your data into a powerful enabler of innovation, efficiency, and sustainable growth.

Our Services

How We Transform Your Business

Comprehensive data and AI solutions designed to accelerate your digital transformation journey

Data Modernization

We architect and implement scalable, cloud-based data platforms using Snowflake, Databricks, and modern ETL frameworks. Our approach ensures data unification, integrity, and accessibility — enabling enterprises to extract maximum value from every data point.

Advanced Analytics

With cutting-edge analytical models and visualization tools, we uncover hidden insights, predict business outcomes, and enhance decision-making. Our data experts help you transition from descriptive reporting to predictive and prescriptive intelligence.

AI & Agentic Automation

We design and deploy intelligent AI agents that automate workflows, interpret business context, and act autonomously. From customer engagement to enterprise operations, our solutions bring agility, precision, and scalability through AI-powered automation.

Intelligent CRM & Customer Insights

We enhance CRM systems with AI-driven intelligence to deliver personalized recommendations, lead prioritization, and customer retention strategies that boost lifetime value.

Cybersecurity and Governance

At Cache Digitech, security is intrinsic to every solution. We implement robust frameworks for data protection, access control, and regulatory compliance, ensuring trust and transparency in all digital ecosystems.

Our Strategic Technology Partners

To deliver world-class data and AI capabilities, we collaborate with global technology leaders:

Snowflake

Unified data platform for analytics, AI, and secure data sharing

Databricks

Collaborative data engineering and machine learning platform

Senpiper

Low-code AI platform enabling intelligent process automation

Bridge AI

Framework for agentic and conversational AI applications

GCP / AWS / Azure

Scalable, cloud-native environments with enterprise-grade security

Global Impact

Through these partnerships, Cache Digitech provides end-to-end solutions spanning data engineering, analytics, AI deployment, automation, and governance across multiple industries — including BFSI, Telecom, Retail, Manufacturing, Healthcare .

Product & Services

Cybersecurity
Safeguarding your digital assets with proactive defense, resilient operations, and strategic threat management.
Cybersecurity Services

Cybersecurity Services by Cache
At Cache, we deliver comprehensive, end-to-end cybersecurity solutions that empower organizations to operate with confidence in an ever-evolving threat landscape. From strategic consulting and risk management to managed detection and response, we help enterprises strengthen their security posture, achieve compliance, and ensure operational resilience.
Our Capabilities

Cache Cybersecurity Capabilities

Consulting Services
Strategic guidance on security posture, risk management, policies, and compliance frameworks tailored to your enterprise goals.

Firewall Management
Deployment, configuration, and lifecycle maintenance of perimeter and internal firewalls to protect critical networks.

Endpoint Detection & Response (EDR / MDR / XDR)
Continuous detection, investigation, and automated response to endpoint threats for enhanced endpoint security.

Network Access Control (NAC)
Enforce access policies, authenticate devices, and maintain a secure, compliant network environment.

Security Information & Event Management (SIEM) & SOAR
Centralized monitoring, correlation, and automated response through our advanced Cache SOC / NOC frameworks.

Zero Trust Network Access (ZTNA)
Enforce least-privilege access, continuous identity verification, and micro-segmentation for stronger security control.

Web Application Firewall (WAF)
Protect your web applications from OWASP Top 10 vulnerabilities and evolving attack vectors.

Data Loss Prevention (DLP) & Data Classification
Identify, classify, and protect sensitive data across on-premises, cloud, and hybrid environments.

Secure Access Service Edge (SASE)
Converged networking and security architecture at the edge to deliver secure, high-performance connectivity.

Network Detection & Response (NDR)
Real-time traffic monitoring and anomaly detection for proactive network defense.

Cloud Access Security Broker (CASB) & Cloud Security Posture Management (CSPM / CSPN)
Unified visibility, policy enforcement, and threat control for cloud applications and workloads.

Database Activity Monitoring (DAM) / Financial Data Protection (FIN)
Continuous monitoring of critical databases and financial data to prevent misuse and unauthorized access.

Email Security
Protection against phishing, spam, and advanced email-borne threats through AI-driven detection and policy enforcement.

Security Audits
Periodic independent assessments to validate configuration, compliance, and control effectiveness.

Dark & Deep Web Monitoring
Continuous surveillance of dark web sources to detect leaked credentials or compromised data early.
Advanced Services

Specialized & Advanced Cybersecurity Services

Social Engineering & Attack Simulations
Phishing, Smishing, and Vishing simulations; Red and Blue Team assessments to evaluate technical and human resilience.

Digital Forensics & Root Cause Analysis
Post-incident investigation, evidence preservation, and in-depth analysis to prevent recurrence and strengthen defenses.
Our Value

How Cache Delivers Value
Enhanced threat detection and faster incident response capability.
Protection of critical systems ensuring data confidentiality, integrity, and availability.
A risk-aware, resilient IT environment designed for modern cybersecurity challenges.

Our Process

Cache Cybersecurity Engagement Framework

Our cybersecurity engagements follow a structured, outcome-driven model ensuring transparency, accountability, and maturity progression:
Operate & Manage

Audit
Focus:
Assess current security posture, identify vulnerabilities, and classify risks.
Outcomes:
Baseline security score and prioritized remediation roadmap.

Consult
Focus:
Align strategy, policy, and technology to business objectives.
Outcomes:
Tailored cybersecurity roadmap and compliance framework.

Design
Focus:
Architect a Zero-Trust, defense-in-depth security model covering identity, data, and network layers.
Outcomes:
Secure system designs with micro-segmentation and layered defense.

Implement
Focus:
Deploy and integrate security tools, automate workflows, and conduct user training.
Outcomes:
Fully operational, integrated, and monitored security environment.

Operate & Manage
Focus:
24/7 threat monitoring, continuous improvement, and rapid response.
Outcomes:
Proactive threat detection, reduced response time, and ongoing optimization.
Partnership Benefits

Why Partner with Cache

Holistic Security Coverage
Protection across perimeter, endpoint, network, cloud, identity, and data.

Strategic Depth
Threat intelligence, rigorous audits, and proactive defense strategies.

Tailored Specialization
Custom cybersecurity programs for specific enterprise risks and industry regulations.

Continuous Resilience
Building adaptive systems that anticipate, prevent, and recover from evolving threats.

Trust & Compliance by Design
Privacy, regulatory adherence, and best practices embedded across every service.

Strengthen Your Cyber Resilience with Cache
Partner with Cache to secure your enterprise against today's and tomorrow's cyber threats. Our combination of advanced threat intelligence, automated response, and continuous monitoring ensures your business operates securely — with confidence, compliance, and resilience.

Growth is Guaranteed
That's Cache's Promise
Employees' Provident Fund

Cloud
Cloud & Digital Transformation

Cloud & Digital Transformation Services by Cache

Empowering enterprises to innovate, modernize, and scale with secure, agile, and intelligent cloud solutions.
At Cache, we help organizations accelerate their digital transformation journey through end-to-end cloud consulting and infrastructure modernization services.
Our expertise spans across public, private, and hybrid cloud environments, ensuring your technology ecosystem becomes more agile, efficient, and future-ready.
From cloud migration and application modernization to security, governance, and cloud operations, Cache enables your business to innovate at speed while maintaining enterprise-grade reliability and compliance.
Our Capabilities

Cache Cloud Capabilities

Cloud Security Services
End-to-end protection for data, workloads, and applications across multi-cloud and hybrid environments — powered by zero-trust architecture and compliance-first governance.

Hybrid Cloud Solutions
Seamlessly integrate on-premises systems with public and private clouds to achieve maximum flexibility, scalability, and operational control.

Cloud Assessment & Strategy
Evaluate your current cloud adoption and identify opportunities to improve performance, security, and cost optimization before migration.

Cloud Migration Services
Migrate applications and workloads to leading cloud platforms (AWS, Azure, Google Cloud, or hybrid environments) with minimal downtime and maximum efficiency.

Cloud Repatriation
Move workloads strategically back to on-premises infrastructure when business, cost, or compliance requirements demand.

Application Modernization
Transform legacy applications into cloud-native, scalable, and cost-efficient systems that support your digital goals.

Managed Cloud Operations
24/7 proactive monitoring, governance, and performance optimization to ensure your cloud environment runs securely and efficiently.

Cloud Deployment & Automation
Simplify cloud and edge deployments through automation, ensuring compliance, reliability, and fast time-to-value.

Enterprise Email Solutions
Secure, scalable, and collaborative cloud-based email systems with built-in data protection and advanced availability.
Our Approach

Our Proven Cloud Transformation Approach
At Cache, we follow a structured five-phase model designed for transparency, agility, and measurable outcomes:
Operate & Manage

Audit
Objective:
Assess your IT and cloud ecosystem to identify cost, performance, and security gaps.
Highlights:
Infrastructure evaluation, risk analysis, cost-benefit insights.

Consult
Objective:
Define the right cloud strategy aligned with your digital transformation goals.
Highlights:
Platform selection, compliance mapping, cloud roadmap.

Design
Objective:
Architect scalable, secure, and future-ready cloud solutions.
Highlights:
Hybrid and multi-cloud design, data management, and security frameworks.

Build
Objective:
Deploy, migrate, and integrate with automation for faster delivery.
Highlights:
Infrastructure provisioning, cloud integration, continuous deployment.

Operate & Manage
Objective:
Optimize and govern your cloud environment for long-term success.
Highlights:
Monitoring, performance tuning, and cost management.
Infrastructure Excellence

Infrastructure & Cloud Operations
Cache delivers robust infrastructure management and cloud operations services that ensure seamless performance across your technology ecosystem — including data centers, storage, hypervisors, and multi-cloud platforms.

We help enterprises achieve:

Resilient Infrastructure
Enterprise-grade cloud and hybrid solutions designed for mission-critical operations.

Innovation Enablement
Scalable infrastructure supporting advanced R&D and rapid prototyping.

Business Agility
Flexible frameworks enabling quick response to evolving business needs.

Growth Acceleration

Optimized cloud infrastructure built for scalability, performance, and cost-efficiency.
Partnership Benefits

Why Partner with Cache

End-to-End Cloud Expertise
Proven experience across cloud migration, hybrid cloud, and digital transformation programs.

Security by Design
Built-in zero-trust, compliance, and governance frameworks for every engagement.

Automation & Intelligence
AI-driven monitoring, auto-scaling, and predictive analytics for optimized operations.

Flexible Deployment Models
Choose from cloud, hybrid, edge, or on-premises based on your operational and regulatory needs.

Proven Delivery Excellence
Consistent, outcome-driven execution across industries and enterprise scales.

What We Design
Custom infrastructure solutions designed for performance, scalability, and reliability
Our infrastructure design services create robust, scalable architectures tailored to your specific requirements. We design comprehensive solutions covering servers, storage, networking, virtualization, and cloud integration that provide optimal performance while supporting future growth and business requirements.

Server Architecture
High-performance server and compute design

Network Design
Scalable and secure network architecture

Storage Solutions
Advanced storage and data management design

Cloud Integration
Hybrid and multi-cloud architecture design

What We Build
End-to-end infrastructure deployment with seamless integration and minimal business disruption
Our infrastructure build services provide complete implementation and deployment of IT infrastructure solutions. From server provisioning and network setup to storage configuration and system integration, we handle every aspect of infrastructure deployment while ensuring minimal business disruption and optimal performance.

Server Deployment
Complete server provisioning and configuration

Network Implementation
Network infrastructure setup and configuration

Storage Integration
Storage systems deployment and optimization

System Integration
Seamless integration with existing systems

What We Operate & Manage
24/7 infrastructure monitoring, management, and support for optimal performance and reliability
Our managed infrastructure services provide round-the-clock monitoring and

management of your IT infrastructure. With 24/7 operations center coverage, proactive monitoring, and rapid issue resolution, we ensure your infrastructure operates at peak performance while you focus on core business activities.

24/7 Monitoring
Continuous infrastructure monitoring and alerting

Proactive Management
Preventive maintenance and optimization

Rapid Response
Quick issue resolution and support

Performance Optimization
Ongoing performance tuning and improvements

What We Migrate
Seamless data center migration services with zero downtime and complete business continuity
Our data center migration services provide comprehensive planning and execution for relocating your entire IT infrastructure. From legacy systems to modern cloud environments, we ensure seamless transitions with minimal business disruption, maintaining data integrity and system performance throughout the migration process.

Migration Planning
Comprehensive migration strategy and timeline development

Data Protection
Complete data backup and security during migration

Zero Downtime
Business continuity with minimal service interruption

Quality Assurance
Thorough testing and validation post-migration

Cloud & Digital Transformation Services by Cache

Empowering enterprises to innovate, modernize, and scale with secure, agile, and intelligent cloud solutions.
At Cache, we help organizations accelerate their digital transformation journey through end-to-end cloud consulting and infrastructure modernization services.
Our expertise spans across public, private, and hybrid cloud environments, ensuring your technology ecosystem becomes more agile, efficient, and future-ready.
From cloud migration and application modernization to security, governance, and cloud operations, Cache enables your business to innovate at speed while maintaining enterprise-grade reliability and compliance.
Our Capabilities

Cache Cloud Capabilities

Cloud Security Services
End-to-end protection for data, workloads, and applications across multi-cloud and hybrid environments — powered by zero-trust architecture and compliance-first governance.

Hybrid Cloud Solutions
Seamlessly integrate on-premises systems with public and private clouds to achieve maximum flexibility, scalability, and operational control.

Cloud Assessment & Strategy
Evaluate your current cloud adoption and identify opportunities to improve performance, security, and cost optimization before migration.

Cloud Migration Services
Migrate applications and workloads to leading cloud platforms (AWS, Azure, Google Cloud, or hybrid environments) with minimal downtime and maximum efficiency.

Cloud Repatriation
Move workloads strategically back to on-premises infrastructure when business, cost, or compliance requirements demand.

Application Modernization
Transform legacy applications into cloud-native, scalable, and cost-efficient systems that support your digital goals.

Managed Cloud Operations
24/7 proactive monitoring, governance, and performance optimization to ensure your cloud environment runs securely and efficiently.

Cloud Deployment & Automation
Simplify cloud and edge deployments through automation, ensuring compliance, reliability, and fast time-to-value.

Enterprise Email Solutions
Secure, scalable, and collaborative cloud-based email systems with built-in data protection and advanced availability.
Our Approach

Our Proven Cloud Transformation Approach
At Cache, we follow a structured five-phase model designed for transparency, agility, and measurable outcomes:
Operate & Manage

Audit
Objective:
Assess your IT and cloud ecosystem to identify cost, performance, and security gaps.
Highlights:
Infrastructure evaluation, risk analysis, cost-benefit insights.

Consult
Objective:
Define the right cloud strategy aligned with your digital transformation goals.
Highlights:
Platform selection, compliance mapping, cloud roadmap.

Design
Objective:
Architect scalable, secure, and future-ready cloud solutions.
Highlights:
Hybrid and multi-cloud design, data management, and security frameworks.

Build
Objective:
Deploy, migrate, and integrate with automation for faster delivery.
Highlights:
Infrastructure provisioning, cloud integration, continuous deployment.

Operate & Manage
Objective:
Optimize and govern your cloud environment for long-term success.
Highlights:
Monitoring, performance tuning, and cost management.
Infrastructure Excellence

Infrastructure & Cloud Operations
Cache delivers robust infrastructure management and cloud operations services that ensure seamless performance across your technology ecosystem — including data centers, storage, hypervisors, and multi-cloud platforms.

We help enterprises achieve:

Resilient Infrastructure
Enterprise-grade cloud and hybrid solutions designed for mission-critical operations.

Innovation Enablement
Scalable infrastructure supporting advanced R&D and rapid prototyping.

Business Agility
Flexible frameworks enabling quick response to evolving business needs.

Growth Acceleration

Optimized cloud infrastructure built for scalability, performance, and cost-efficiency.
Partnership Benefits

Why Partner with Cache

End-to-End Cloud Expertise
Proven experience across cloud migration, hybrid cloud, and digital transformation programs.

Security by Design
Built-in zero-trust, compliance, and governance frameworks for every engagement.

Automation & Intelligence
AI-driven monitoring, auto-scaling, and predictive analytics for optimized operations.

Flexible Deployment Models
Choose from cloud, hybrid, edge, or on-premises based on your operational and regulatory needs.

Proven Delivery Excellence
Consistent, outcome-driven execution across industries and enterprise scales.

Growth is Guaranteed
That's Cache's Promise
Employees' Provident Fund
We value the opportunity to connect with you. Please submit your inquiries and feedback, and our experienced professionals are ready to assist you.

Product & Services

Managed Services
Comprehensive managed services delivering expert support, infrastructure management, and operational excellence for your business
Comprehensive Manage |
Remote Infra

What We Audit & Assess
Comprehensive IT auditing, compliance assessment, and infrastructure evaluation services
Our comprehensive IT audit services provide thorough assessment of your technology infrastructure, security posture, and compliance status. We conduct detailed evaluations of systems, processes, and controls to identify vulnerabilities, ensure regulatory compliance, and optimize operational efficiency. Our expert auditors deliver actionable recommendations to enhance your IT governance and risk management.

Infrastructure Audit
Complete assessment of IT infrastructure and systems

Security Assessment
Comprehensive security posture evaluation and testing

Compliance Review
Regulatory compliance assessment and documentation

Risk Analysis

Detailed risk assessment and mitigation planning

What We Staff & Support
Expert IT professionals and dedicated support teams for comprehensive technology operations
Our managed manpower services provide access to highly skilled IT professionals and dedicated support teams to augment your internal capabilities. We offer flexible staffing solutions including dedicated resources, project-based teams, and specialized expertise across various technology domains. Our professionals integrate seamlessly with your existing teams to deliver exceptional results.

Dedicated Teams
Skilled professionals dedicated to your projects

Specialized Expertise
Domain experts in various technology areas

Flexible Engagement
Scalable team size based on project requirements

Continuous Support
Ongoing professional development and training

What We Negotiate & Manage
Strategic contract management, vendor relations, and procurement optimization services
Our contract management services provide comprehensive support for IT vendor relationships, contract negotiations, and ongoing contract administration. We help optimize vendor agreements, ensure compliance with contractual terms, manage service level agreements, and provide strategic guidance for technology procurement and vendor management to maximize value and minimize risk.

Contract Negotiation
Expert negotiation of vendor contracts and agreements

SLA Management
Service level agreement monitoring and enforcement

Cost Optimization
Contract cost analysis and optimization strategies

Vendor Relations
Strategic vendor relationship management

What We Monitor & Protect
24/7 network operations, security monitoring, and comprehensive incident response services
Our NOC/SOC services provide round-the-clock monitoring, management, and protection of your IT infrastructure and security posture. We combine network operations center capabilities with security operations center expertise to deliver comprehensive monitoring, threat detection, incident response, and proactive maintenance to ensure optimal performance and security of your technology environment.

24/7 Monitoring
Continuous network and security monitoring services

Threat Detection
Advanced threat detection and security analysis

Incident Response
Rapid incident response and resolution services

Performance Management

Proactive performance monitoring and optimization

What We Manage Remotely
Comprehensive remote infrastructure management, cloud operations, and system administration
Our remote infrastructure management services provide comprehensive oversight and administration of your IT infrastructure from our centralized operations centers. We manage servers, networks, storage systems, cloud environments, and applications remotely to ensure optimal performance, security, and availability while reducing the need for on-site technical resources.

Server Management
Complete remote server administration and maintenance

Cloud Management
Multi-cloud platform management and optimization

Storage Management
Remote storage system monitoring and administration

Network Management
Remote network configuration and performance optimization

Founder's Message

Prarthana Gupta
Founder & Chairperson, Cache Digitech Pvt. Ltd.
Managing Director, Calipers Consulting Pvt. Ltd.
Founder, CIO Digital Foundation (CIDIF)
"When you lead with purpose, innovation finds its direction."
34+Years JourneyGlobalTechnology Partner"Rooted in values and driven by innovation where technology built on trust transforms lives with purpose and empathy."

The Beginning

When I began this journey more than three decades ago, I didn't have a large team or endless resources just a deep conviction to create something meaningful, built on values, hard work, and trust. That conviction gave birth to Cache Digitech Pvt. Ltd., which has today evolved into a trusted global technology partner empowering organizations across the world.

From day one, our attitude has been simple yet unwavering always put the customer first. Every milestone we've achieved is the result of relentless effort, sleepless nights, and a firm belief that trust must be earned, not claimed.

Today, as we see that trust growing with customers placing their confidence in us year after year it fills me with both pride and gratitude. It reaffirms that when you lead with honesty, consistency, and care, success becomes a shared journey.

Vision & Purpose

At Cache, we continue to innovate across Cybersecurity, Artificial Intelligence, Cloud, and IT Infrastructure, helping businesses stay secure, agile, and future-ready. Yet, beyond technology, what defines us is our belief that innovation must serve people it must inspire, include, and uplift.

Through CIDIF (CIO Digital Foundation), I've extended that vision to empower young minds, bridging the gap between aspiration and opportunity, and preparing the next generation of digital leaders.

For me, technology is not just a business it's a responsibility. A responsibility to use knowledge, empathy, and creativity to make the world a more connected, secure, and compassionate place.

Every step we take at Cache reflects this purpose. And as we move forward, one thing will never change our promise to keep our customers first, always.

Prarthana Gupta

Problems & Diagnostics

We help you identify root causes quickly and systematically — from security incidents and network outages to cloud anomalies and compliance gaps — so your teams can focus on outcomes.

Security Incidents & Threat Diagnostics

Analyze alerts, logs, and events to identify root causes, attack vectors, and remediation steps.

Network Downtime & Performance Bottlenecks

Trace packet loss, latency spikes, and configuration drift across WAN/LAN to restore reliability.

Cloud Cost Anomalies & Resource Sprawl

Detect idle workloads, rightsize instances, and implement governance for predictable cloud spend.

Endpoint Health & Application Stability

Diagnose device performance issues, crashes, and policy conflicts; improve user experience at scale.

Compliance Gaps & Audit Readiness

Map controls to frameworks, close gaps, and automate evidence collection for faster audits.

Data Pipelines & Observability

Instrument pipelines, track SLAs, and resolve data integrity issues with end-to-end visibility.

Cache Digitech Pvt. Ltd.
A leading System Integration, Consulting and IT Infrastructure company
empowering organizations to innovate, secure, and scale for over three decades
in a digital first world.
Global Presence
34+ Years Experience
24x7 Support

About Cache Digitech
Cache Digitech Pvt. Ltd. is a leading System Integration, Consulting and IT
Infrastructure company that has been empowering organizations to innovate,
secure, and scale for over three decades in a digital first world. Headquartered
in New Delhi, with offices in Mumbai and Dubai Cache Digitech operates with a
truly global footprint. Our business and services extend across continents,
supporting enterprises around the world through our 24x7 service infrastructure,
global operations, and partner ecosystem.
At Cache Digitech, we believe technology is not just an enabler, it's a catalyst
for transformation. Our solutions are designed to help organizations modernize
their IT landscape, accelerate digital transformation, and stay resilient in a
connected, data-driven world. Cache Digitech has built a reputation for
engineering excellence, customer-centricity, and technological foresight and is
serving enterprises across telecom, BFSI, manufacturing, public sector, and
global enterprises delivering solutions that combine intelligence, agility, and
trust.

Our Commitment

We offer a comprehensive portfolio spanning System Integration, IT Infrastructure, Cybersecurity, Cloud, Consulting & Audit, Data Analytics, Artificial Intelligence (AI), and Managed Services : making us a trusted, end-to-end technology partner.
"To become the most trusted company for our customers, OEMs, and employees"

Our Core Offerings
Comprehensive technology solutions designed to transform and elevate your business

System Integration & IT Infrastructure Solutions
Designing and implementing secure, scalable, and high-performing IT ecosystems by integrating cutting-edge technologies across compute, storage, and network layers. Building the digital backbone of enterprises through advanced data centers, private and hybrid cloud environments, and resilient IT frameworks built for performance and growth.

Cybersecurity
Delivering robust, end-to-end security architectures and compliance frameworks that safeguard businesses and ensure continuity in an evolving threat landscape. Protecting enterprises with end-to-end security architectures, compliance solutions, and managed detection & response services.

Cloud & Digital Transformation
Helping enterprises modernize through hybrid and multi-cloud strategies that enhance scalability, agility, and operational efficiency. Enabling organizations to move to the cloud confidently through hybrid, private, and public cloud solutions, ensuring business continuity and scalability.

Consulting & Audit
Our Consulting & Audit division specializes in designing and implementing end-to-end infrastructure solutions that are scalable, secure, and compliant. We conduct audits, gap analyses, and risk assessments, and our consulting experts ensure your systems remain robust, optimized, and aligned with compliance and business objectives.

Data Analytics & Artificial Intelligence (AI)
Our Data Analytics team transforms complex data into meaningful business insights, empowering leaders to make informed, strategic, and data-driven decisions. Our energetic AI team works across industries to solve complex challenges, delivering predictive dashboards, intelligent insights, and enhanced user experiences that drive innovation and efficiency.

Managed Services
At the heart of our delivery excellence lies our world-class service infrastructure, comprising a 24x7 Global Network Operations Center (NOC) and a dedicated Security Operations Center (SOC). These centers ensure continuous monitoring, rapid response, and compliance — keeping our customers' operations secure, connected, and protected worldwide. Offering round-the-clock operational support, proactive monitoring, and optimization services to help clients focus on their core business goals.

Why Cache Digitech
What makes Cache Digitech different is our agility, flexibility, and customer-first mindset.
We combine deep technical expertise with human understanding, offering accessible global support, world-class infrastructure, and a fantastic team of skilled professionals who deliver excellence with speed and empathy.
Every engagement reflects our commitment to quality, innovation, and enduring partnerships.

Our Philosophy

Delivering Excellence with Agility, Service with Heart

We blend engineering precision with genuine human care — ensuring that technology not only performs but also empowers.
At the heart of Cache Digitech lies a simple yet powerful belief - technology should serve people. Every project we deliver reflects our commitment to excellence, our agility in execution, and our empathy for the customer journey. This human-centered approach has made us a trusted partner for some of India's and the world's most respected enterprises.

Our Industry Expertise
With a strong presence across multiple sectors, Cache Digitech partners with global technology leaders to deliver end-to-end solutions that drive efficiency, innovation, and customer satisfaction.
Banking & Financial Services
Automobile & Manufacturing
Healthcare & Hospitality
Government & Public Sector

Trusted By
Driven by trust, strengthened by results. Our clients are the proof of our commitment to quality.

Our Vision
To become the most trusted technology partner and the best company for our customers, OEMs, and employees powered by a global presence, best-in-class service infrastructure, 24x7 NOC, and secure, compliant SOC.
We aim to continuously earn trust and confidence through operational excellence, accessibility, and unwavering commitment to quality.

Our Mission
To design and deliver agile, intelligent, and secure digital ecosystems that elevate business performance, strengthen digital trust, and drive sustainable global growth , while making every customer, partner, and employee proud to be part of the Cache Digitech journey.

Privacy Policy
Your privacy is our priority.

Overview
At Cache Digitech Technology, we are committed to protecting your privacy and
ensuring the security of your personal information. This Privacy Policy explains
how we collect, use, disclose, and safeguard your information when you visit our
website or use our services.

Information We Collect

Personal Information
• Name and contact information
• Email addresses and phone numbers
• Billing and payment information
• Account credentials
• Communication preferences

Technical Information
• IP addresses and device identifiers
• Browser type and version
• Operating system information
• Usage data and analytics
• Cookies and tracking data

How We Use Information
We use the collected information for various purposes, including but not limited
to:
• Service Delivery: Provide services, process transactions, customer support,

account management
• Communication: Send updates, marketing materials, security alerts, policy changes
• Improvement: Analyze usage patterns, enhance user experience, develop new features, quality assurance

Information Sharing
We do not sell, trade, or otherwise transfer your personal information to third parties without your consent, except in the following circumstances:
• Service providers who assist in our operations
• Legal compliance and law enforcement requests
• Business transfers or mergers
• Protection of rights and safety

Data Security
We implement comprehensive security measures to protect your personal information:
• Encryption: SSL/TLS encryption for data in transit
• Access Control: Restricted access to authorized personnel
• Secure Storage: Encrypted databases and secure servers
• Monitoring: 24/7 security monitoring and alerts

Your Rights
You have several rights regarding your personal information:
• Access your personal data
• Correct inaccurate information
• Request data deletion
• Data portability
• Withdraw consent
• Object to processing

Growth is Guaranteed
That's Cache's Promise
Employees' Provident Fund

Telecom Excellence

Cache Digitech in Telecom

Three Decades of Trust, Transformation & Technology Excellence

Cache Digitech has been an inseparable part of India's telecom evolution. For over three decades, we have empowered leading service providers and network operators to design, build, secure, and scale their digital infrastructure. From the early days of switching systems to today's era of 5G, Edge, and Cloud, Cache has consistently stood as a trusted technology partner — delivering mission-critical infrastructure, zero-downtime operations, and digital resilience.

32+Years Experience500+Certified Experts75K+Devices ManagedWith 32+ years of system integration expertise, a 500+ certified technocrat workforce , and 750+ support locations , Cache continues to power telecom innovation with agility and accountability. We are proud to be managing over 75,000 devices across telecom networks nationwide, ensuring performance, availability, and security 24×7.

Our Capabilities

Our Telecom Capabilities

Infrastructure Modernization & Network Transformation

Large-scale deployments of IPDR, DNS, CGNAT, and Broadband Gateways across PAN India.
Infrastructure readiness for 4G/5G Core, VoLTE, AAA-PCRF, and H-Cloud environments.
Over 1,200+ servers deployed PAN India for H-Cloud and Aura Cloud projects with Dell Technologies.
End-to-end modernization of legacy systems for scalability, resilience, and performance.

Cybersecurity Enablement for Telcos

Deployment of SIEM, SOAR, UEBA, NGAV & Zero Trust frameworks for network and enterprise security.
Firewall policy orchestration (Tufin), event management (SolarWinds), endpoint protection (VMware Carbon Black), and network visibility (Riverbed).
24×7 Managed SOC with real-time threat detection, response, and compliance reporting (PCI-DSS, GDPR, SOX).
Deep expertise in protecting carrier-grade networks and subscriber data across distributed environments.

Network Automation & Monitoring

Advanced telemetry, SDN/NFV integration, and APSTRA-driven network automation.
Centralized monitoring of 75,000+ active devices, including 20,000+ FortiGate firewalls and multi-vendor assets.
End-to-end performance analytics for uptime assurance and proactive fault management.

Cloud & Data Center Transformation

Design, build, and operation of private, hybrid, and multi-cloud infrastructure.
Integration of OpenStack, VMware, and Nutanix platforms for high-availability and cloud-native telecom workloads.
Seamless orchestration and virtualization for next-gen OSS/BSS systems.

24×7 Global Support & Field Engineering Services

Dedicated NOC/SOC with ITIL-aligned operations, proactive monitoring, and L1–L3 support.
Field engineering presence across 8+ remote locations for leading operators.

CCNA, NSE, and OEM-certified engineers ensuring continuous uptime and SLA adherence.
Our Impact

Value Delivered to the Telecom Ecosystem

Digital Resilience
Strengthened network continuity, redundancy, and uptime across mission-critical infrastructure.

Security First
Multi-layered cybersecurity framework protecting telco data and customer trust.

Operational Excellence
Streamlined automation, faster rollout cycles, and reduced OPEX.

Scalability & Agility
Future-ready infrastructure supporting 5G, Edge, and AI-driven network operations.

Customer Trust
Long-standing partnerships with leading telecom operators and OEMs built on responsiveness, transparency, and delivery excellence.
Future Vision

Looking Ahead: Telecom 2030 and Beyond
As the telecom sector enters the 5G-Advanced and 6G era, Cache Digitech is co-creating the future with OEMs, ISVs, and network partners to:

AI-Driven Network Operations
Build predictive maintenance and self-healing capabilities for next-generation networks.

Green Telecom
Enable energy-efficient infrastructure and sustainable innovation across the telecom ecosystem.

5G Testbeds & Co-Innovation Labs
Collaborate with Dell, Cisco, and global NEPs to pioneer telecom innovation.

Sanchalan.ai
Our indigenous GRC platform automating compliance and risk management for Telecom & BFSI.

Global Managed Services
Expand next-generation NOC/SOC and Cloud Command Centers for unified monitoring worldwide.

Growth is Guaranteed
That's Cache's Promise
Employees' Provident Fund
We value the opportunity to connect with you. Please submit your inquiries and feedback, and our experienced professionals are ready to assist you.

Founder's Message

Prarthana Gupta
Founder & Chairperson, Cache Digitech Pvt. Ltd.
Managing Director, Calipers Consulting Pvt. Ltd.
Founder, CIO Digital Foundation (CIDIF)

"When you lead with purpose, innovation finds its direction."
34+Years JourneyGlobalTechnology Partner"Rooted in values and driven by innovation where technology built on trust transforms lives with purpose and empathy."

The Beginning

When I began this journey more than three decades ago, I didn't have a large team or endless resources just a deep conviction to create something meaningful, built on values, hard work, and trust. That conviction gave birth to Cache Digitech Pvt. Ltd., which has today evolved into a trusted global technology partner empowering organizations across the world.

From day one, our attitude has been simple yet unwavering always put the customer first. Every milestone we've achieved is the result of relentless effort, sleepless nights, and a firm belief that trust must be earned, not claimed.

Today, as we see that trust growing with customers placing their confidence in us year after year it fills me with both pride and gratitude. It reaffirms that when you lead with honesty, consistency, and care, success becomes a shared journey.

Vision & Purpose

At Cache, we continue to innovate across Cybersecurity, Artificial Intelligence, Cloud, and IT Infrastructure, helping businesses stay secure, agile, and future-ready. Yet, beyond technology, what defines us is our belief that innovation must serve people it must inspire, include, and uplift.

Through CIDIF (CIO Digital Foundation), I've extended that vision to empower young minds, bridging the gap between aspiration and opportunity, and preparing the next generation of digital leaders.

For me, technology is not just a business it's a responsibility. A responsibility to use knowledge, empathy, and creativity to make the world a more connected, secure, and compassionate place.

Every step we take at Cache reflects this purpose. And as we move forward, one thing will never change our promise to keep our customers first, always.
Prarthana Gupta

Problems & Diagnostics

We help you identify root causes quickly and systematically — from security incidents and network outages to cloud anomalies and compliance gaps — so your teams can focus on outcomes.

Security Incidents & Threat Diagnostics

Analyze alerts, logs, and events to identify root causes, attack vectors, and remediation steps.

Network Downtime & Performance Bottlenecks

Trace packet loss, latency spikes, and configuration drift across WAN/LAN to restore reliability.

Cloud Cost Anomalies & Resource Sprawl

Detect idle workloads, rightsize instances, and implement governance for predictable cloud spend.

Endpoint Health & Application Stability

Diagnose device performance issues, crashes, and policy conflicts; improve user experience at scale.

Compliance Gaps & Audit Readiness

Map controls to frameworks, close gaps, and automate evidence collection for faster audits.

Data Pipelines & Observability

Instrument pipelines, track SLAs, and resolve data integrity issues with end-to-end visibility.

Founder, CIO Digital Foundation (CIDIF)
"When you lead with purpose, innovation finds its direction."
34+Years JourneyGlobalTechnology Partner"Rooted in values and driven by innovation where technology built on trust transforms lives with purpose and empathy."

The Beginning
When I began this journey more than three decades ago, I didn't have a large team or endless resources just a deep conviction to create something meaningful, built on values, hard work, and trust. That conviction gave birth to Cache Digitech Pvt. Ltd., which has today evolved into a trusted global technology partner empowering organizations across the world.
From day one, our attitude has been simple yet unwavering always put the

customer first. Every milestone we've achieved is the result of relentless effort, sleepless nights, and a firm belief that trust must be earned, not claimed.

Today, as we see that trust growing with customers placing their confidence in us year after year it fills me with both pride and gratitude. It reaffirms that when you lead with honesty, consistency, and care, success becomes a shared journey.

Vision & Purpose

At Cache, we continue to innovate across Cybersecurity, Artificial Intelligence, Cloud, and IT Infrastructure, helping businesses stay secure, agile, and future-ready. Yet, beyond technology, what defines us is our belief that innovation must serve people it must inspire, include, and uplift.

Through CIDIF (CIO Digital Foundation), I've extended that vision to empower young minds, bridging the gap between aspiration and opportunity, and preparing the next generation of digital leaders.

For me, technology is not just a business it's a responsibility. A responsibility to use knowledge, empathy, and creativity to make the world a more connected, secure, and compassionate place.

Every step we take at Cache reflects this purpose. And as we move forward, one thing will never change our promise to keep our customers first, always.

Prarthana Gupta

Problems & Diagnostics

We help you identify root causes quickly and systematically — from security incidents and network outages to cloud anomalies and compliance gaps — so your teams can focus on outcomes.

Security Incidents & Threat Diagnostics

Analyze alerts, logs, and events to identify root causes, attack vectors, and remediation steps.

Network Downtime & Performance Bottlenecks

Trace packet loss, latency spikes, and configuration drift across WAN/LAN to restore reliability.

Cloud Cost Anomalies & Resource Sprawl

Detect idle workloads, rightsize instances, and implement governance for predictable cloud spend.

Endpoint Health & Application Stability

Diagnose device performance issues, crashes, and policy conflicts; improve user experience at scale.

Compliance Gaps & Audit Readiness

Map controls to frameworks, close gaps, and automate evidence collection for faster audits.

Data Pipelines & Observability

Instrument pipelines, track SLAs, and resolve data integrity issues with end-to-end visibility.
